# A History of Final Exercises at the University of Virginia

So astute was Mr. Jefferson in determining the basic educational policy for the University of Virginia that the policy has seen very little change in the University's 205-year history. The colorful ceremony you will see today, however, would not have been held under Thomas Jefferson's original plan, which did not provide for degrees and diplomas. Although the early students of the University were highly respected for their knowledge, some of them petitioned the Board of Visitors for diplomas to improve their opportunities for employment.

Out of deference to the founder, the Board took no action on these requests during Jefferson's lifetime, but fifteen months after his death, it changed the policy and directed that plans be laid for the first "Public Day" (commencement). In July 1829, the first Public Day was held in the Dome Room of the Rotunda. The program was very long, and it included orations by students. By 1848, the program began with a procession led by students and involved a single address by a prominent person.

Public Day was held in the Dome Room until the Rotunda annex was completed in 1853. It was then held in the public hall of the annex until the Rotunda and the annex burned in 1895. When Cabell Hall was completed in 1898, the Public Day programs were held in its auditorium. President Alderman's inauguration in 1905 brought about the more formal procession as seen today. It is now led by a faculty grand marshal.

When the McIntire Amphitheatre was completed in 1921, it became the site for the final exercises. A sudden drenching rainstorm disrupted the 1949 ceremony, sending the soaked graduates and guests into any shelter they could find. The threat of sudden storms and the increased number of graduates caused President Colgate Darden to declare that the 1952 ceremony would be the last to be held in the amphitheatre. Since then, Finals have been held on the Lawn except in bad weather.

Even when the ceremonies were held in the amphitheatre, the participants marched from the Rotunda, down the Lawn to the site of the ceremony. Students have long considered it a high privilege to have the opportunity to walk down the Lawn at Finals, and today's students place an even greater importance on this privilege. So important to many of them is the ceremonial walk down the Lawn, that a number of students, cheated out of a ceremony on the Lawn by bad weather, "confirm" their graduation by processing down the Lawn after Finals.

Through 1961, the president conferred the degrees and handed each recipient a diploma. By this time, graduates numbered in the thousands. The ceremony had become much too lengthy and the logistics too complex. Beginning in 1962 and continuing today, degrees are conferred in a main ceremony by the president. Degree recipients and their guests then reassemble later in school and department ceremonies.

# The Academic Procession

## The Procession

The academic procession is led by the grand marshal of the University bearing the official silver and ebony mace. Most of the processioners wear the academic costume accepted by a majority of the principal institutions of higher learning in the United States, though certain academic officials, such as the rector of the University, wear particular costumes indicative of current office. The processional order is listed below.

## The Gown

The processional gown is usually black; the design of the sleeves denotes the type of degree being conferred. The bachelor's sleeve is long and pointed. The master's sleeve has squared ends, with the arc of a circle near the bottom and a slit for the arm near the elbow. The doctoral sleeve is bell-shaped with three velvet bars. The doctoral robe has full-length velvet panels in front, either black or a color that symbolizes the wearer's field of learning.

## The Hood

A separate ornamental fold hangs down the back of the gown, and its lining carries the colors of the college or university granting the degree (for the University of Virginia, orange and blue). An outside band of velvet varies in width according to the degree: two inches for bachelor's degree, three for the master's, and five for the doctorate. The color of the band and other velvet on the doctoral hood symbolizes the field of learning (such as dark blue for philosophy). The length of the hood also varies with the level of the degree: bachelor's, three feet; master's, three and one-half feet; and doctorate, four feet. Bachelor's and master's degree candidates often do not wear their hoods.

## The Cap

The cap is usually the black mortarboard, decorated with a tassel. Gold tassels may be worn by holders of doctoral degrees. Generally, the colors of the tassels represent the principal fields of learning and are described below.

## **Daniel T. Willingham**

Daniel Willingham is Professor of Psychology at the University of Virginia.

Mr. Willingham earned a bachelor's degree, with honors, from Duke University and a Ph.D. degree from Harvard University, both in Psychology. He taught briefly at Williams College before coming to the University of Virginia as an assistant professor in 1992. He is a leading figure in cognitive psychology with a specialty in educational applications.

Mr. Willingham often writes for lay audiences, focusing on the translation and dissemination of complex scientific ideas that may prove useful to educational methods and policies. The practical focus of his work can be seen in a sample of the titles of his articles: "Is listening to a book the same thing as reading it?"; "Math anxiety: Can teachers help students reduce it?"; and "Critical thinking: Why is it so hard to teach?" His work has been published in a variety of popular publications, including *New York Times*, *Washington Post*, *Los Angeles Times*, *Atlantic*, *Wall Street Journal*, and *Scientific American*. His contribution to public awareness of psychological research was recognized with the Outstanding Public Communication of Education Research Award from the American Educational Research Association. His international influence and broad appeal are underscored by the fact that his writing has appeared in 23 languages.

Mr. Willingham's commitment to education extends beyond his written work; he actively participates in shaping educational strategies and curricula through his roles on various advisory boards, including the National Board for Education Sciences, to which he was appointed by President Obama. He has served as a consultant to education departments and agencies in England, Vietnam, Germany, Malaysia, Australia, and many states in the United States.

Mr. Willingham has twice won UVA's All-University Teaching Award. More recently he has deployed his expertise in an unexpected medium; Mr. Willingham started a TikTok channel in late 2022, creating videos to help students study more effectively. As of this writing he has 135,000 followers and his videos have accrued several million views.

## Risa L. Goluboff

Risa Goluboff is the Dean and Arnold H. Leon Professor of Law at the University of Virginia's School of Law. Dean Goluboff joined the law faculty in 2002 and is the first woman named to the deanship in the almost 205-year history of the Law School.

Dean Goluboff is a renowned legal historian whose scholarship and teaching focus on American constitutional and civil rights law, and especially their historical development in the twentieth century. In addition to her appointment in the Law School, Dean Goluboff is professor of history in the Corcoran Department in History, a faculty affiliate at the Carter G. Woodson Institute for African-American and African Studies, and a faculty senior fellow at the Miller Center. She is also chair of the advisory board for the UVA Karsh Institute of Democracy.

Dean Goluboff is the author of *The Lost Promise of Civil Rights* (Harvard, 2007), which won the 2010 Order of the Coif Biennial Book Award and the 2008 James Willard Hurst Prize. Her second book, *Vagrant Nation: Police Power, Constitutional Change, and the Making of the 1960s* (Oxford, 2016) was supported by a 2009 John Simon Guggenheim Foundation Fellowship in Constitutional Studies and a 2012 Frederick Burkhardt Residential Fellowship from the American Council of Learned Societies. The book received the American Historical Association's 2017 Littleton-Griswold Prize, the 2017 Lillian Smith Book Award, the 2017 John Phillip Reid Book Award, and the 2016 David J. Langum, Sr. Prize in American Legal History, among other honors. She is the co-editor of *Civil Rights Stories*, and the author of numerous shorter works.

Dean Goluboff is a fellow of the American Academy of Arts and Sciences, a member of the American Law Institute, and a distinguished lecturer for the Organization of American Historians. In 2023, President Biden appointed her to the Permanent Committee for the Oliver Wendell Holmes Devise, which documents the history of the U.S. Supreme Court. Dean Goluboff chaired the University's Deans Working Group, established to lead the University's response to the events at the University on August 11-12, 2017.

She received the Law School's Carl McFarland Award for excellence in faculty scholarship in 2008, the University of Virginia's All-University Teaching Award in 2011, and the Raven Award from The Raven Society in 2024.

Prior to joining the faculty at the University of Virginia, Dean Goluboff clerked for Judge Guido Calabresi of the U.S. Court of Appeals for the Second Circuit and Justice Stephen Breyer of the U.S. Supreme Court.

### BIOMEDICAL ENGINEERING

Grace Crusel Bingham  
Dissertation: *The Mysterious Case of Pulmonary Fibrosis: A Pursuit of Immune and Matrix Factors in Pulmonary Fibrosis*

Matthew Daniel DiSalvo  
Dissertation: *Applications of Finite Element Analysis to Model and Understand the Complexities of Muscle in Clinically Relevant Scenarios*

Taylor Eggertsen  
Dissertation: *Systems Pharmacology Approaches Identify Drugs and Mechanisms that Regulate Cardiomyocyte Growth*

Delaney Greer Fisher  
Dissertation: *Pioneering MRI-Guided Focused Ultrasound Platforms for the Treatment of Cerebral Cavernous Malformation*

Bryana Nicole Harris  
Dissertation: *A Comprehensive Systems Biology Approach to Identify Novel Mechanisms Regulating Cardiomyocyte Proliferation*

Zhijian He  
Dissertation: *Biophysical Cues on Human Lung Defense: From Airway Remodeling to Mucosal Drug Delivery*

Julie Leonard-Duke  
Dissertation: *Multiscale Modeling of Idiopathic Pulmonary Fibrosis*

Allison Nicole McCrady  
Dissertation: *Ultrasound and Computational Modeling Reveal Complex Relationships between Muscle Size, Quality, and Strength in Patients with Neuromuscular Diseases*

Andrew Miller  
Dissertation: *Mechanogenomics: A Systems-Level Genomics Investigation of Cell-Matrix Mechanobiology*

Helen Louise Sporkin  
Dissertation: *Creatine Chemical Exchange Saturation Transfer Imaging and Arterial Spin*

*Labeling in the Study of Peripheral Arterial Disease*

Julia Tumbic  
Dissertation: *Development of Jammed Microparticle-Based Materials for Embedded 3D Printing, Injectable Cell Delivery Applications, and In Vitro Cancer Cell Migration Studies*

Yu Wang  
Dissertation: *Development and Application of StrainNet: Improved Myocardial Strain Analysis of Cine MRI by Deep Learning From DENSE*

Xiaoyu Yu  
Dissertation: *Smartphone-Fluidic Imaging System for Cell-Based Therapy in Diabetes*

### CHEMICAL ENGINEERING

Asanka Kumara Wijerathne  
Amarasooriyage  
Dissertation: *Computational Modeling of Activation and Deactivation of Supported Metal Catalysts*

Natalia Diaz Montenegro  
Dissertation: *Sulfur Poisoning and Regeneration of Aftertreatment Oxidation Catalysts*

William Hart  
Dissertation: *Cell Signaling and Microenvironment Determinants of Chemoresponse in Glioblastoma*

Tracy Kuper  
Dissertation: *Multiscale Approaches Linking Transport and Metabolism to Guide Biofilm Intervention Strategies*

Konstantin Mamedov  
Dissertation: *Supported Metal Oxide Catalysts in the Conversion of Oxygenates*

Anukriti Shrestha  
Dissertation: *Size-Dependent Thermodynamic Analyses for Transition Metal Carbides and Supported Oxides*

Anna Sviripa  
Dissertation: *Silver Oxidation and Oxygen Speciation in Ethylene Epoxidation*

Caroline Jing Wang  
Dissertation: *Understanding Ion Transport Restrictions in Battery Materials*

Zihao Yan  
Dissertation: *Investigation and Development of Advanced Pd-Based and Non-Precious Metal-Based Catalysts for Acetylene Semi-Hydrogenation*

### CIVIL ENGINEERING

Tahmina Ahmed  
Dissertation: *Development of*

*Viability PCR for Water Quality Assessment and Disinfection Quantification*

Gertrude Katherine Pavur  
Dissertation: *A Down-to-Earth Examination of Hydrological Natural Disasters and Risk Using Earth Observations*

### COMPUTER ENGINEERING

Mahmoud Ahmed Raafat Abdallah Elnaggar  
Dissertation: *Towards Safer Autonomous Systems: From Vulnerability Mitigation to Safety Assurance*

Sudhir Kateel Shenoy  
Dissertation: *A Framework for Developing Adaptive Social Robots: Integrating Theory of Mind and Model-Based Reinforcement Learning*

### COMPUTER SCIENCE

Md Aashikur Rahman Azim  
Dissertation: *Toward Designing Usable Body-Based Gesture Interactions*

Jiayi Chen  
Dissertation: *A Journey of Personalization-Aware Collaborative Multimodal Machine Learning*

Zhendong Chu  
Dissertation: *Developing Adaptive Information Systems: Learning and Evolving Through Human Feedback*

Wanyu Du  
Dissertation: *Towards Controllable and Data-Efficient Natural Language Generation*

Ingy ElSayed-Aly  
Dissertation: *Safe Sequential Decision Making in Uncertain Environments*

Chijung Jung  
Dissertation: *Toward Robust Swarm Algorithms via Precise Causal Analysis*

Josephine Lamp  
Dissertation: *Trustworthy Clinical Decision Support Systems for Medical Trajectories*

Nabeel Nasir  
Dissertation: *Untangling the Cloud from Edge Computing for the Internet of Things*

Zhe Wang  
Dissertation: *Toward Out-of-Distribution Generalization of Deep Learning Models*

Dong Xu  
Dissertation: *Understanding and Enhancing Neural Network Verification Performance*

### ELECTRICAL ENGINEERING

Md Sabbir Akhanda  
Dissertation: *Experimental Inves-*

*tigation of the Nernst Effect for Thermomagnetic Applications*

Mohammad Khairul Bashar  
Dissertation: *Coupled Oscillator Based Dynamical Systems to Solve Combinatorial Optimization*

Bingtian Guo  
Dissertation: *Antimony-Based Low-Noise Avalanche Photodiodes*

Xiangwen Guo  
Dissertation: *High-Performance Heterogeneously Integrated Photodiodes for Microwave Photonics and Quantum Measurements*

Scott Eric Hinton  
Dissertation: *Exploring New Techniques for Superconducting Kinetic Inductance Parametric Amplifiers*

Masoud Jafari  
Dissertation: *Development of Heterogeneously Integrated Photodiodes and Schottky Diodes on Silicon Platforms*

Xinjian Liu  
Dissertation: *Power Management Techniques in Sub-Microwatt Scalable Systems-on-Chip for Self-Powered Internet-of-Things Applications*

Krishna Makhija  
Dissertation: *The Precision Radio Instrument for Antenna Measurements*

Natalie Blaine Ownby  
Dissertation: *Robust, Low-Power IC Design Through Reconfigurable References and Biases: A Focus on Environmental Temperature Variation and User Diversity in Health Sensing*

Rocio Elisa Pantoja Rodriguez  
Dissertation: *Virtualized Controller for Computational RFID-Based IoT Sensors in Industry 4.0*

Jaya Lakshmi Ravipudi  
Dissertation: *Physical Layer Impairment-Aware Resource Allocation in Multiband and Multicore Elastic Optical Networks*

Chengshuai Shi  
Dissertation: *Sequential Decision-Making in Intelligent Multi-Agent Systems*

Tanjin Taher Toma  
Dissertation: *Deep Learning and Physics-Inspired Modeling for Cell Segmentation and Tracking with Application to Bacterial Biofilms*

Xizixiang Wei  
Dissertation: *Toward Efficient and Reliable Wireless Federated Learning: System Design and Theoretical Analysis*

*The Good Old Song*

That good old song of Wah-hoo-wah,

We'll sing it o'er and o'er;

It cheers our hearts and warms our blood

To hear them shout and roar.

We come from old Virginia

Where all is bright and gay;

Let's all join hands and give a yell

For the dear old UVA.
