# A History of Final Exercises at the University of Virginia

So astute was Mr. Jefferson in determining the basic educational policy for the University of Virginia that the policy has seen very little change in the University's 204-year history. The colorful ceremony you will see today, however, would not have been held under Thomas Jefferson's original plan, which did not provide for degrees and diplomas. Although the early students of the University were highly respected for their knowledge, some of them petitioned the Board of Visitors for diplomas to improve their opportunities for employment.

Out of deference to the founder, the Board took no action on these requests during Jefferson's lifetime, but fifteen months after his death, it changed the policy and directed that plans be laid for the first "Public Day" (commencement). In July 1829, the first Public Day was held in the Dome Room of the Rotunda. The program was very long, and it included orations by students. By 1848, the program began with a procession led by students and involved a single address by a prominent person.

Public Day was held in the Dome Room until the Rotunda annex was completed in 1853. It was then held in the public hall of the annex until the Rotunda and the annex burned in 1895. When Cabell Hall was completed in 1898, the Public Day programs were held in its auditorium. President Alderman's inauguration in 1905 brought about the more formal procession as seen today. It is now led by a faculty grand marshal.

When the McIntire Amphitheatre was completed in 1921, it became the site for the final exercises. A sudden drenching rainstorm disrupted the 1949 ceremony, sending the soaked graduates and guests into any shelter they could find. The threat of sudden storms and the increased number of graduates caused President Colgate Darden to declare that the 1952 ceremony would be the last to be held in the amphitheatre. Since then, Finals have been held on the Lawn except in bad weather.

Even when the ceremonies were held in the amphitheatre, the participants marched from the Rotunda, down the Lawn to the site of the ceremony. Students have long considered it a high privilege to have the opportunity to walk down the Lawn at Finals, and today's students place an even greater importance on this privilege. So important to many of them is the ceremonial walk down the Lawn, that a number of students, cheated out of a ceremony on the Lawn by bad weather, "confirm" their graduation by processing down the Lawn after Finals.

Through 1961, the president conferred the degrees and handed each recipient a diploma. By this time, graduates numbered in the thousands. The ceremony had become much too lengthy and the logistics too complex. Beginning in 1962 and continuing today, degrees are conferred in a main ceremony by the president. Degree recipients and their guests then reassemble later in school and department ceremonies.

# The Academic Procession

## The Procession

The academic procession is led by the grand marshal of the University bearing the official silver and ebony mace. Most of the processioners wear the academic costume accepted by a majority of the principal institutions of higher learning in the United States, though certain academic officials, such as the rector of the University, wear particular costumes indicative of current office. The processional order is listed below.

## The Gown

The processional gown is usually black; the design of the sleeves denotes the type of degree being conferred. The bachelor's sleeve is long and pointed. The master's sleeve has squared ends, with the arc of a circle near the bottom and a slit for the arm near the elbow. The doctoral sleeve is bell-shaped with three velvet bars. The doctoral robe has full-length velvet panels in front, either black or a color that symbolizes the wearer's field of learning.

## The Hood

A separate ornamental fold hangs down the back of the gown, and its lining carries the colors of the college or university granting the degree (for the University of Virginia, orange and blue). An outside band of velvet varies in width according to the degree: two inches for bachelor's degree, three for the master's, and five for the doctorate. The color of the band and other velvet on the doctoral hood symbolizes the field of learning (such as dark blue for philosophy). The length of the hood also varies with the level of the degree: bachelor's, three feet; master's, three and one-half feet; and doctorate, four feet. Bachelor's and master's degree candidates often do not wear their hoods.

## The Cap

The cap is usually the black mortarboard, decorated with a tassel. Gold tassels may be worn by holders of doctoral degrees. Generally, the colors of the tassels represent the principal fields of learning and are described below.

## Carla Williams

Carla Williams is the Vice President for Intercollegiate Athletics at the University of Virginia. Her appointment at UVA in October 2017 made her the first female African-American director of athletics at a Power Five conference institution.

A native of LaGrange, Georgia, Ms. Williams earned her bachelor's and master's degrees from the University of Georgia and her Ph.D. from Florida State University. At Georgia, she was a three-year starter for the women's basketball team as a student-athlete from 1985 to 1989. Prior to coming to UVA, Ms. Williams served as an athletics administrator at the University of Georgia for 13 years and was named deputy director of athletics in 2015. During her tenure at Georgia, its athletics teams won 16 NCAA team championships and 37 Southeastern Conference titles.

Ms. Williams has a forward-thinking approach to leading Virginia Athletics. Her focus is on providing opportunities for student-athletes to maximize their college experience while establishing a culture and support system for the sport programs to compete for championships. Her commitment to academic excellence is unwavering.

The success of UVA Athletics under Ms. Williams and her involvement in some of college athletics' top issues have not gone unnoticed. During her tenure, UVA has won multiple national championships and 16 ACC Championships, and has set record numbers for placement on the ACC Academic Honor Roll. In addition, UVA has achieved the highest grade-point average totals in program history and has been recognized by the NCAA for outstanding achievement on academic progress reports. Since 2020, seven UVA student-athletes have been named ACC Scholar-Athlete of the Year for their respective sports.

Ms. Williams was named the Women Leaders in College Sports 2019 Administrator of the Year for all NCAA Division I FBS athletics programs. In 2021, the *Sports Business Journal* named her one of its finalists for Division I Athletics Director of the Year. In 2023, the Women in Sports and Events organization recognized her as one of the four recipients of its Woman of the Year Awards based on accomplishments and significant contributions to the business of sports.

Ms. Williams was selected to work on the NCAA's Name Image Likeness Legislation Solutions Group to examine student-athlete name, image, and likeness rights and is a member of the NCAA Federal and State Legislation Working Group. She was named to the executive committee of the recently formed Black AD Alliance, which was established to promote the growth, development, and elevation of Black athletics administrators at the Division I level.

## Louis P. Nelson

Louis Nelson is Professor of Architectural History and the Vice Provost for Academic Outreach at the University of Virginia.

Mr. Nelson earned a bachelor's degree from The College of William and Mary and master's and Ph.D. degrees from the University of Delaware. He has served on the faculty at UVA for more than 22 years.

Mr. Nelson is a specialist in the built environments of the early modern Atlantic world, with published work on the American South, the Caribbean, and West Africa, and is a leading advocate for place-based public history. At UVA and in Charlottesville, this work has taken the form of scholarship that contextualizes the four monuments installed at the height of Jim Crow segregation, walking tours and movies that seek to disseminate a broader understanding of how racism is inscribed in the local landscape, a university renaming commission, partnership on a new website for and a narrative interpretation of the Memorial to Enslaved Laborers, and co-editing both a digital series on UVA and the History of Race and the book *Educated in Tyranny: Slavery at Thomas Jefferson's University*. He was also the lead author and co-PI on Race, Place and Equity, a \$5M Andrew Mellon Foundation funded grant.

Mr. Nelson is an accomplished scholar, with two book-length monographs published by the University of North Carolina and Yale University Presses, five edited collections of essays, two terms as senior co-editor of *Buildings and Landscapes*--the leading English language forum for scholarship on vernacular architecture--and numerous articles. He is also a celebrated teacher, having won a University-wide teaching award in 2007 and serving as the 2008 UVA nominee for a state-wide Outstanding Faculty Award. His books and articles have been awarded the 2017 Abbott Lowell Cummings Prize, the 2017 John Brickerhoff Jackson Prize, the 2016 Allen G. Noble Prize, the 2016 Best Essay Prize from the Southeast Chapter of the Society of Architectural Historians (SESAH), the 2015 Bishir Prize, the SESAH 2010 Outstanding Book of the Year, the SESAH 2008 Best Article of the Year, among others.

### Doctors of Philosophy

#### BIOMEDICAL ENGINEERING

Rachel K Bour  
Dissertation: *Advanced Biomanufacturing Methods for Creation of Tissue Engineered Constructs to Treat Volumetric Muscle Loss Injuries*

Nicholas James Cornell  
Dissertation: *Engineering Microporous Annealed Particle Scaffolds as a 3D Stem Cell Culture Platform Through the Presentation and Preservation of Native Bioactive Signaling Cues*

Eli Draizen  
Dissertation: *Explainable Deep Generative Models, Ancestral Fragments, and Murky Regions of the Protein Structure Universe: Datasets, Models, and Analyses of Fold Space*

Sarah Elizabeth Dyer  
Dissertation: *Skeletal Muscle Salvage and Repair Following Extremity Trauma*

Blaise Nicholas Pfaff  
Dissertation: *Engineering Microporous Annealed Particle Scaffolds as a Chondrogenic Niche for Microfracture-Based Articular Cartilage Repair*

Jonathan Turner  
Dissertation: *Development and Application of Therapeutics for Repair of Polytraumatic Volumetric Muscle Loss Injuries*

Zhixing Wang  
Dissertation: *Techniques and Applications in Rapid Spiral Magnetic Resonance Imaging*

### CHEMICAL ENGINEERING

Brooke Ashley Brown  
Dissertation: *Signaling Regulation of the Epithelial-Mesenchymal Transition in the Hypoxic Pancreas Cancer Microenvironment*

Chen Cai  
Dissertation: *Understanding and Modifying Transport Processes in Thick All Active Material (AAM) Lithium-Ion Battery Electrodes*

Yu Ren Chen  
Dissertation: *Degradation Study of Cu-SSZ-13 Selective Catalytic Reduction Catalysts*

Keka Mandal  
Dissertation: *Investigating the Stability and Modes of Deactivation of Metal-Exchanged Zeolites via Computational Modeling*

Paul Joseph Myers  
Dissertation: *Integrated Mechanistic and Data-Driven Computational Modeling of Kinase-Regulated Cell Signaling*

Jenna Lynn Sumeiy  
Dissertation: *Engineering Mechanically Dynamic Hyaluronic Acid Hydrogels to Investigate Stromal Cell Mechanosensitivity*

### CIVIL ENGINEERING

Chelsea Love Dandridge  
Dissertation: *Rainfall-Triggered Landslide Hazard Assessment in the Lower Mekong River Basin Using Model and Satellite-Based Estimates*

Ana Elizabeth Estrella You  
Dissertation: *Investigating the Synergistic Effect of Free Chlorine and Silver Ions in Natural Waters for Antibacterial Activity, and Developing a Material for Low-Dose Chlorine Release in Water for Pathogen Inactivation*

Patrick Illand Hancock  
Dissertation: *Utilizing Episodic Thinking and Temporal Framing to Enhance Future-Oriented Decision-Making in Social and Design Contexts*

Jamie Danielle Harris  
Dissertation: *Improving Silver-Ceramic-Based Point-of-Use Water Treatment with Novel Copper Addition and Commercial Water Filters*

Ugur Kilic  
Dissertation: *Understanding Effects of Nano and Micro Scale Additives on Rheological, Buildability, and Mechanical Characteristics of 3D Printed Concrete*

Catherine Owsik  
Dissertation: *Inherited Affect: The Emotion Transmitted from Generation to Generation*

Allen Townsend  
Dissertation: *Closing the Loop: Expanding Our Approaches to Conservation Through Evaluation and Behavioral Science*

Sydney Simone Turner  
Dissertation: *A Two-Fold Approach to Addressing Water Insecurity and Vector Control: Water Disinfectants for the Control of Aedes Aegypti and Engineering Social Justice*

Runze Zhang  
Dissertation: *The Improvement of Science Quality and Utility of Soil Moisture Estimations from Satellite-Based Passive Microwave Remote Sensing*

Wuhuan Zhang  
Dissertation: *Long-Term Monitoring and Evaluation of Multiple Green Infrastructure Designs for Stormwater Quality Performance, Effects of Vegetation, and Maintenance*

### COMPUTER ENGINEERING

Abu Hasnat Mohammad Rubaiyat  
Dissertation: *Transport Transforms for Solving Signal Estimation and Classification Problems*

Varundev Sukhil Suresh Babu  
Dissertation: *A Modular Approach to Multi-Agent Autonomous Racing: Design, Implementation, and Verification*

### COMPUTER SCIENCE

Md Fazlay Rabbi Masum Billah  
Dissertation: *Enhancing the Human-IoT Interaction Experience Through Deep Multimodal Sensor Fusion*

Hanjie Chen  
Dissertation: *Neural Model Interpretability for Natural Language Processing*

Ye Gao  
Dissertation: *Addressing Realisms Faced by Deep Learning Models in Cyber Physical Systems*

Vanamala Venkataswamy  
Dissertation: *Scheduling to Ensure Performance and Cost Effectiveness in Power-Modulated Datacenters*

Jian Wang  
Dissertation: *Deep Image Analysis Based on Deformable Shapes and Its Applications to Neuroimaging*

Nan Wang  
Dissertation: *Towards Transparent and Fair Personalization Systems*

### ELECTRICAL ENGINEERING

Magda Amiridi  
Dissertation: *Tensor Modeling of High-Dimensional Distributions and Its Applications in Machine Learning*

Divya Duvvuri  
Dissertation: *Ultra-Low-Power Wake-Up Receivers with Environmental Adaptive Designs Enabling Fully Integrated IoT Nodes*

Shourya Gupta  
Dissertation: *Enabling Internet-of-Things Using Low-Power Circuit Design and Automation Techniques*

Sumanth Kumar Kamineni  
Dissertation: *Design Methodologies and Frameworks for Autonomous Synthesis of System on Chip (SoC) Components*

Hao Lou  
Dissertation: *Probabilistic Modeling and Analysis Methods for Large-Scale Data Compression*

Tingyang Meng  
Dissertation: *Distributed Control of Multi-Agent Systems and Management of Networked Battery Units*

Han Yu Tsao  
Dissertation: *Terahertz Detachable Chip-to-Chip Interconnectors*

Beichen Wang  
Dissertation: *Microresonator-Based Optical Frequency Combs*

<sup>1</sup> Distinguished Majors Program

for Microwave and Millimeter-Wave Applications

Linsheng Zhang  
Dissertation: *Micro-Watt Level Multi-GHz Wake-Up Receivers and THz DAT Power Amplifiers for the Next-Generation Wireless Communication*

**MATERIALS SCIENCE AND ENGINEERING**

Utibe-Eno Charles-Granville  
Dissertation: *Assessment of Chromate Effects on the Galvanic-Coupling-Induced Localized Corrosion of AA7050-T7451*

Du Cheng  
Dissertation: *First-Principles Investigation of Crystal Structures and Stabilities of Precipitates in GP Zones-Strengthened Mg Alloys*

Angela Yu Gerard  
Dissertation: *Electrochemical Passivation of Ni-Fe-Cr-Mn-Co Multi-Principal Element Alloy: An Evaluation of the Fate of Alloying Elements During Aqueous Oxidation*

Timothy Quinn Hartnett  
Dissertation: *Computational and Informatics Guided Design of Magnetic Materials*

Wenhao Lin  
Dissertation: *Ultralow Modulus and High Strength Ti-25Nb (at%) Alloy*

Peter Matthew Litwin  
Dissertation: *The Growth and Characterization of 2D Van Der Waals Crystals by Molecular Beam Epitaxy*

Coleman Everett Tolliver  
Dissertation: *Exploring the Aqueous Dissolution-Precipitation Mechanism of Ca-Si-Na-O Containing Reactants to Form Crystalline Calcium Silicate Hydrates in Carbonated Environments*

**MECHANICAL AND AEROSPACE ENGINEERING**

Madelyn Anne Kramer Eaton  
Dissertation: *Predicting Pulmonary Damage in Behind Armor Blunt Trauma*

Lucy Elaine Fitzgerald  
Dissertation: *Toward Breath Sensors that are Self-Powered by Design*

Nathaniel Gibbons  
Dissertation: *Computational Analysis of Circumferentially Grooved Seals Using Effective Film Thickness*

Sayak Mukherjee  
Dissertation: *Development of Human Muscle Control Framework Based on Deep Reinforcement Learning*

Spencer Stebbins  
Dissertation: *Subsonic Icing Aerodynamics and Supersonic Ice Impact of a Hypersonic Forebody*

Haozhe Zhang  
Dissertation: *Mechanics in Soft-Hard Materials Integrated Structures and Systems*

**SYSTEMS ENGINEERING**

Logan David Clark  
Dissertation: *Reaching Kinematics in VR: Exploring the Influence of Movement Direction, Hand Dominance, Hemisphere, and Arm Length*

Debajyoti Datta  
Dissertation: *Efficient Collection, Evaluation and Deployment of Large Scale Deep Learning Models in Low Resource Natural Language Processing Scenarios*

Mojtaba Heidarysafa  
Dissertation: *Knowledge Discovery and Decision Support Systems Using Natural Language Processing in Applications for Societal Good*

Bingxu Li  
Dissertation: *Tying Skin Deformation Patterns with Discriminability of Compliance to Design Soft Haptic Actuators*

Davis Christopher Loose  
Dissertation: *Reinforcement Learning and Scenario-Based Order for Modeling Enterprise Resilience of Maritime Container Ports*

Valerie J Michel  
Dissertation: *Stakeholder Assessment of Equity-Centered Coastal Adaptation: Insights from Norfolk, Virginia's Climate Resilience Efforts*

Moen Mostafavi  
Dissertation: *Enhancing Emotion Understanding in Messaging Interactions*

Neda Nazemi  
Dissertation: *Exploratory Versus Predictive Approach for Proactive Decision-Making in Water Resource Management*

Courtney Cecile Rogers  
Dissertation: *Expanding Human Factors/Ergonomics to Address Social Determinants of Health: A Patient Ergonomics Approach to Birth Justice*

Runze Yan  
Dissertation: *A Computational Framework for Modeling Cyclic Human Behaviors from Multi-Modal Sensor Data*

Luwei Zeng  
Dissertation: *Assessing Spatially and Temporally Heterogeneous Impacts and Equity Implications of*

*Recurrent Flooding in the Transportation System: A Case Study of the Hampton Roads Region*

*The Good Old Song*

That good old song of Wah-hoo-wah,

We'll sing it o'er and o'er;

It cheers our hearts and warms our blood

To hear them shout and roar.

We come from old Virginia

Where all is bright and gay;

Let's all join hands and give a yell

For the dear old UVA.
